

TECHABILITY

IT Strategy

YOUR PROBLEM

- X We don't know which systems to use
- X Our systems and applications don't speak to each other
- X Our technology isn't supporting our business growth
- X We're spending too much on IT

HOW CAN TECHABILITY HELP?

- ✓ Whether you're a small provider or large organisation, we can provide a tailored IT Strategy review to ensure your technology resources are enabling your business to operate efficiently and grow.
- ✓ We can co-create a robust technology strategy ensuring your technology aligns to and achieves your business objectives and addresses IT governance, security and privacy, data management, applications and compliance.
- ✓ For larger clients, we can work alongside you to develop the vision, strategy and roadmap for wide scale technology transformations.

WHAT OUR CLIENTS SAY

"Anita is amazing!!! She's sorted my entire business from sole trader to employer so quickly and efficiently. As I grew Anita helped to implement strategies to ease workloads technologically, helped implement systems for staff of 8 to use, and did it all so easily and smoothly. From A-Z there's nothing this woman couldn't help me with when expanding. We are so grateful!" Melissa Freeman, Port Macquarie Disability & Nursing Services

"Thanks for guiding us on this journey Anita and Jen. You have really helped us move digital transformation along in a strategic way at the right pace and with great outcomes." Birgitte Maibom, CEO, Learning Links

"TechAbility has led our team through strategic process of reviewing existing software (customer management, finance, HR), creating a master plan, developing detailed requirements and negotiating with vendors on our behalf. They are knowledgeable, thorough, professional and have great sector experience." Andrew Ellis, CEO, Enhanced Lifestyles
