

# TECHABILITY

## YOUR PROBLEM

- X I need to find a good entry level CRM to start my business
- X We're doing everything manually
- X We have too many spreadsheets
- X We're duplicating data
- X Our CRM doesn't do what we need it to do

## HOW CAN TECHABILITY HELP?

- ✓ We provide totally independent advice to help you select the right NDIS software from the 60+ systems that are available.
- ✓ We have used our years of research to create a comprehensive NDIS software database and an intuitive self-service NDIS Software Finder. You can conduct your own research using our free database; pay a small fee to receive a tailored report from our NDIS Software Finder; or make use of our full service consultation package.
- ✓ Once you have found the right software, we can help manage the whole project for you – migrating your data, configuring the software and training your team to achieve maximum efficiencies.

## WHAT OUR CLIENTS SAY

"I spent weeks trying to figure out which software would suit our needs...trailing dozens of them but to no avail...to say I was exasperated is an understatement, furious about wasting so much time and so frustrated thinking I would never find the right software. Finally we contacted Techability, and within hours we had three excellent options shortlisted. We go live with our new software soon and are so very grateful for the assistance we received from Techability. I only wish I had contacted them sooner."  
Tammy Donnelly, Mobile Physiotherapist

"Anita has a very rare position in the NDIS marketplace - she is the only ex-CTO in Australia I know of who provides genuinely independent advice to NDIS providers about which software best suits their needs. Anita has detailed knowledge of just about every CRM and other software product in the marketplace that purports to be 'NDIS-ready', and cuts through the sales spin to independently support businesses to make effective technology decisions." Brendon Grail, former CEO, Advisory Board Member and ex-Director of NDIA
